

TORQ™

Sternal closure, with a twist™

Improves sternal stability

Ensures consistent closures

Prevents wire breakages

TORQ™

The TORQ™ sternal closure device improves sternal closure when using standard steel wires

Improves sternal stability

The TORQ device tightly tensions and twists the wire, resulting in a well approximated and stable sternum.

Ensures consistent closures

The TORQ device standardizes the procedure for tensioning and twisting the wire, ensuring a secure closure, every time.

Prevents wire breakages

The TORQ device lets you tension and twist the sternal wires without worrying about wire breakages.
